William E. (Billy) McKinstry, proprietor of Billy's Boats and Motors, was appointed a member of the Pahokee City Council, at the regular meeting Monday night, to fill the unexpired term of Councilman Elmer B. ## Vaughn Tells Ag Agents About Sugar

CLEWISTON — Speaking to a group of county agricultural agents at the Clewiston Inn, following their tour of the plantations, sugar mill, and cattle ranch, President Harry T. Vaughn of the United States Sugar Corporation told how attempts to grow sugar commercially in Florida dated back to 1850 with failure after failure recorded due largely to the fact that the types of cane planted were not suitable for this area.

He credited C. S. Mott as the man really responsible for the success of the industry in Florida today due to his faith in the project and determination, backed by his financial support.

The turning point came when the corporation established its own research department and developed new types of cane that were disease resistant, hardy and developed to meet conditions in the Everglades.

He pointed out that today these varieties are producing the highest yield of both sugar cane and sugar of any domestic area and in most foreign countries.

He predicted a bright future for sugar production in Florida and stated that tremendous expansion was possible if growers and processors were given assurance that the heavy investment necessary would be justified by reasonable marketing quotas.

He further stated that the United States Sugar Corporation would welcome other sugar producers in the area and would gladly share their knowledge and experience with them in the development of the industry in Florida.

## Deer Hunting In No. 2 & No. 3 Areas

## Here's what the new $3\frac{3}{4}\%$ interest rate on U.S. Savings Bonds means to you:

**\$3 = \$4** *fourteen months faster than before*

### *The Bonds you own are better than ever, too*

The new  $3\frac{3}{4}\%$  rate means your savings grow faster than before with U.S. Savings Bonds. \$3 becomes \$4 or \$3,000 becomes \$4,000 in just seven years, nine months. This applies to all Series E Bonds bought since June 1, 1959.

Then, all older Bonds, both Series E and H, pay more now—an extra  $\frac{1}{2}\%$  from June 1 on, when held to maturity.

And, all Series E Bonds carry a new 10-year extension privilege. This means your Bonds will keep earning liberal interest automatically after maturity.

These three new cash benefits make today's U.S. Savings Bonds the finest in history. They make the ones you own now better, too.

### **More advantages of U.S. Savings Bonds**

You can save automatically. Just tell your company how much to deduct every payday for Bonds, and your Bonds will be delivered to you. This way you can't forget to save. And, remem-

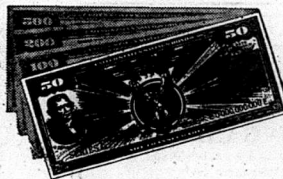

ber, the money you don't touch can't slip through your fingers.

You can get your money, with interest, when you need it. Your Bonds are a ready reserve to use anytime you wish. But, it pays well to hold them.

Your savings can't be lost or stolen. The U.S. Government guarantees to replace your Bonds, free, if anything ever happens to them.

You save more than money. The Bonds you buy help keep the peace because peace costs money. Money for better education, new scientific research, greater military strength. And the money you save helps strengthen our nation's economy which depends on the financial strength of individuals to keep it sound.

Start saving with U.S. Savings Bonds today. You'll save more than money.

The Ione Patterson Circle, Canal Point Baptist WMS, at the November meeting at the home of Mrs. Paul Rardin, voted to work with the Hannah Scoggins-Annie Jones Circle on Tuesday, Nov. 22, packing "sunshine boxes" for presentation to shut-ins on Thanksgiving Day.

The program, "A Woman's Witness," was presented by Mrs. J. D. Latham, assisted by Mrs. J. S. Chastain, Mrs. W. S. Evans and Mrs. J. L. McCall. It was announced the November meeting of the WMS will be held in conjunction with the first meeting in observance of week of prayer at the church, Nov. 28.

Mrs. C. B. Jones, publications chairman, distributed copies of the mission book, "Across the Bridge," which will be taught by Mrs. H. G. Grace of Lake Worth, mission study chairman for the Palm-Lake Association, at the Pahokee First Baptist Church Nov. 22, from 11 a. m. to 2 p. m. It was announced Mrs. J. H. Bordeaux will be hostess at the next circle meeting at her home, Dec. 12, with Mrs. J. L. McCall in charge of the program.

## Cleaner Air Is To Replace Pollution

BREWSTER-American Cyanamid Co. recently marked "Cleaner Air Week" by announcing plans which will increase expenditure for pollution control at its local plant to more than \$2-million.

Arthur Crago, Cyanamid manager of phosphate operations, said, "We are now engaged in expanding our triple superphosphate operation threefold. However, with the installation of this improved air pollution control equipment, the fluorides emitted to the atmosphere will be reduced more than 70 per cent."

Crago explained that all phosphate rock contains fluoride. When the rock is mixed with acid, as in the manufacture of phosphoric acid or triple superphosphate, fluoride is released as a gas.

Cyanamid's pollution monitoring program, already a year old when the triple superphosphate plant went into production, revealed that better control measures were desirable and that quantities of fluorine were escaping from the curing building.

## Choose Right Grass If You Would Have Entire-Year Lawns

GAINESVILLE—The most important consideration, when a green lawn the year around is the goal, is the selection of the proper variety of grass, according to a University of Florida turf specialist.

Frank Wilson, assistant horticulturist with the Florida Agricultural Extension Service, says grasses are now available that do well during the winter if properly managed.

Emerald zoysiagrass has proven to be one of the hardiest grasses suitable to Florida. It has remained green in protected areas throughout the winter, even in north Florida.

Wilson says this grass is one of the last to turn brown when a severe frost hits. Other zoysiagrasses rate high as far as winter color is concerned, with the exception of Meyer zoysiagrass. This is the wide zoysiagrass selection and one of the first grasses to turn brown in cold weather.

The next best grass selection from the standpoint of winter color is the improved bermudagrasses, according to Wilson. These grasses are very rapid growers that respond quickly to liberal supplies of fertilizer and water.

St. Augustinegrass is intermediate in cold hardness. In areas from Orlando south, St. Augustine remains green most of the year. However, it will turn brown if the temperatures drop low enough in these areas. North of Orlando, St. Augustine will be alternately green and brown depending upon the weather.

Pensacola bahiagrass is a pasture grass used for lawn purposes by many who are disgusted with St. Augustinegrass because of chinch bugs, says Wilson. It remains fairly green late in the fall and turns green very early in the spring.

Carpetgrass is one of the poorer grasses when winter color is desired, according to the specialist. It remains brown throughout most of the winter.

Wilson says centipedegrass is the poorest selection one could make if hardness is a factor. The first cold night discolors this grass and it remains brown until spring.

## '61 TORSION-SPRING CHEVROLETS

If you don't think scrapping the front axle has made a world of difference, you haven't driven a Chevy in a while. A few minutes behind the wheel and you can feel why drivers are happier and breakable loads are better protected. But the biggest advantage of all, you'll realize, is that the truck itself (sheet metal, tires, chassis components, everything) takes less abuse. With independent front suspension soaking up road shock and vibration, the truck lasts longer, goes extra thousands of miles before trade-in time. Add that to what everybody's always known about Chevy dependability and you find yourself looking at the soundest truck investment you could bet your business on.

## and look! NEW REAR-ENGINE CORVAIR 95's

A panel and two pickups that put a thrifty air-cooled engine in the rear, the driver up front and as much as 1,900 pounds of load space in between! That's more capacity than a conventional half-tonner. Yet these Corvaire 95's are nearly two feet shorter from bumper to bumper. Highly maneuverable. Built to last and bound to save on a busy schedule!

## Pick your savings target and shoot straight for it!

A home . . . financial security . . . a business of your own. Important savings targets like these cost money—a substantial sum—and more than most of us have. But here's a sure way for you to score a bull's-eye and walk off with the big prize you want.

The secret of saving is system. And the simplest, most automatic saving system ever devised is the Payroll Savings Plan. Best of all, you do more than save through Payroll Savings. You invest your money, too, and make it grow. Here's how it works:

Tell your company pay office how much you want to save each week. Then each pay period that amount will be put aside for you before you have a chance to spend it. Your money will go automatically into U. S. Series E Savings Bonds.

Because Savings Bonds earn good interest—3% compounded semiannually when held to maturity (9 years and 8 months)—they're soon worth much more than you've invested in them. And your Bonds will continue to pay this same good interest as long as 19 years and 8 months. That means a return of up to 85% more than you originally paid.

And remember this. There's no guesswork or chance about the Payroll Savings Plan. It's absolutely safe and sure. Invest just \$7.50 a week. In 5 years you'll have Savings Bonds worth \$2000 in cash; in 10 years, \$4446.

Even if you've never been able to save before, this plan is guaranteed to work for you. So sign up today for Payroll Savings where you work—or invest in Bonds regularly where you bank.

For the big things in your life, be ready with U. S. Savings Bonds
